## EDUCATION

---

### GYAN GANGA COLLEGE OF TECHNOLOGY

Bachelor of Technology in Computer Science & Engineering

Jabalpur, MP

Sept 2022 – Current

### Pt. L. S. JHA Model Higher Secondary School of Excellence

Higher Secondary Certification (PCM) | State Board | 67.2%

Secondary School Certification | State Board | 90%

Jabalpur, MP

June 2021 – March 2022

June 2019 – March 2020

## PROJECTS

---

### AI-Based Financial Advisor | HTML, CSS, JavaScript, Tailwind CSS, Figma

- Designed and developed a responsive, modern frontend using Tailwind CSS, ensuring a seamless user experience across devices.
- Built interactive, dynamic components with JavaScript to enhance usability and improve user engagement.
- Integrated data visualization tools (e.g., Chart.js/D3.js) to display key financial metrics and performance analytics.
- Created high-fidelity UI/UX prototypes in Figma, translating design concepts into functional frontend components.
- Optimized frontend performance, reducing load times and improving accessibility scores.

### UBER Clone Project | MERN (MongoDB, Express.js, React.js, Node.js), Socket.io, Tailwind CSS, GSAP

- Developed a fully functional Uber clone with real-time ride tracking and communication between driver and passenger using Socket.io.
- Implemented user authentication, role-based dashboards, and live location updates for enhanced user interaction.
- Designed a responsive and animated UI using React.js, Tailwind CSS, and GSAP for smooth visual transitions.
- Built a scalable MERN stack architecture ensuring reliable backend performance and seamless frontend integration.

### Business Automation Platform | MERN (MongoDB, Express.js, React.js, Node.js), Meta Cloud API, Tailwind CSS

- Built a SaaS-based automation platform enabling businesses to connect WhatsApp, Facebook, and Instagram for marketing automation.
- Integrated payment gateways with plan-based subscriptions and secure user authentication flow.
- Developed modules for Flow Builder, Broadcasting, Drip Campaigns, and Comment/Message Automation using Meta Graph API.
- Implemented keyword-triggered workflows, analytics dashboard, and cron-based message scheduling for real-time automation.
- Designed an interactive, responsive interface using React.js and Tailwind CSS, ensuring smooth onboarding and usability.

## TECHNICAL SKILLS

---

**Languages:** JavaScript, Python, HTML, CSS,

**Frameworks / Platforms:** WordPress, Tailwind CSS, MERN

**Developer Tools:** Git, GitHub, VS Code

**Design & Prototyping:** Figma

**Libraries:** Chart.js, D3.js, React.js

**Concepts:** UI/UX Design, Data Visualization, AI Integration, Responsive Web Design

## CERTIFICATION

---

- INTRODUCTION TO PYTHON ESSENTIALS I & II (CISCO)
- AWS ACADEMY GRADUATE - GENERATIVE AI FOUNDATIONS
- INTRODUCTION TO CYBERSECURITY
